Hi-Pon 40-04 Epoxy Top Coat is a two-pack amine-adduct cured epoxy finish coat for use on steel and cement surfaces where chemical, oil and abrasion resistant coating is required. It is recommended for non-immersion services. If it is to be applied over steel, it has to be used in combination with the appropriate primers as recommended below. If it is to be applied over concrete, the surface should be acid-treated prior to application. Hi-Pon 40-04 Epoxy Top Coat is also available in non-skid quality.

It is used as an interior top coat for pipelines, equipment, machinery and other steel structures in chemical factory, power plant and etc.

**Colour**
- Standard colours as per colour cards.
- Special colours available upon request

**Gloss Level**
- High-Gloss

**Volume Solids, %**
- 51 ± 2 %

**Specific Gravity**
- 1.00 - 1.30 kg/l (Mixed) depending on colours

**Flash point**
- Base: 23°C
- Hardener: 23°C
- Mix: 23°C

**VOC**
- 535 g/L (EPA Method 24)

** Typical Thickness**
- 50 – 100 μm dry film
- 80 – 130 μm wet film

All surfaces should be clean, dry and free from contamination. The surface should be assessed and treated in accordance with ISO 8504. Oil or grease should be removed in accordance with SSPC-SP1 solvent cleaning.

**Damaged Area**
Damage area should be prepared with abrasive blast cleaning to Sa 2½ (ISO 8501-1:2007). When abrasive blasting is not possible, mechanical cleaning to St 3 (ISO 8501-1:2007) is acceptable. After the surface preparation, patch primer prior to the application of Hi-Pon 40-04 Epoxy Top Coat.

Hi-Pon 40-04 Epoxy Top Coat should always be applied over a recommended anti-corrosive coating scheme for metal surface. The primer surface should be dry and free from all contamination and Hi-Pon 40-04 must be applied within the overcoating intervals specified (refer to application section for details).

**Other Surfaces**
The coating may be used on other substrates. Please contact your local Nippon Paint office for more information.
Avoid paint application when the temperature is below 10°C and relative humidity is over 85%. The temperature of steel surface must be a minimum 3°C above dew point of surrounding air.

**Mixing Ratio**

**APPLICATION METHOD**

Airless spray is recommended for application. Brush and roller are recommended for stripe coating and small areas. Care must be taken to achieve the specified dry film thickness.

The given data must be considered as guidelines only. The actual drying time/times before recoating may be shorter or longer, depending on film thickness, ventilation, humidity, underlying paint system, requirement for early handling and mechanical strength etc. A complete system can be described on a system sheet, where all parameters and special conditions could be included.
The following coating systems are recommended for Hi-Pon 40-04 Top Coat:

**Primer**
- Zinky-12 Inorganic Zinc Rich Primer 77
- Zinky-13 Inorganic Zinc Rich Primer 85
- Zinky-21 Epoxy Zinc Rich Primer 77
- Zinky-22 Epoxy Zinc Rich Primer 80
- Hi-Pon 20-01 Epoxy Primer
- Hi-Pon 20-03 Epoxy Red Oxide Primer
- Hi-Pon 20-04 STE 80
- Hi-Pon 20-04 STE IM 80
- Hi-Pon 20-07 Epoxy Zinc Phosphate 70
- Hi-Pon 20-10 Epoxy Zinc Phosphate 63

**Intermediate**
- Hi-Pon 20-04 STE 80
- Hi-Pon 20-04 STE AL 80
- Hi-Pon 20-04 STE GF 80
- Hi-Pon 20-04 STE IM 80
- Hi-Pon 20-04 STE MIO 80
- Hi-Pon 30-02 Epoxy MIO 80
- Hi-Pon 30-03 Epoxy Midcoat 80

For the choice of coating system for different application, refer to the product brochure or contact Nippon Paint for professional recommendation.

### Packaging

</tr>
</tbody>
</table>

### Storage

**Shelf life**: Part A: 12 months (25°C)
Part B: 12 months (25°C)

Subject to re-inspection thereafter. Higher temperature during storage may reduce the shelf life and may lead to gelling in the tin. Frequent temperature cycles may also shorten the shelf life.

Store in tightly closed container in a dry, cool and well ventilated space, keep away from sources of heat and ignition.
SAFETY PRECAUTION

- This product is intended for use of professional applicators. Refer to the safety information display on the container and in the safety data sheet (SDS) before using the product.
- Use this product in well-ventilated area, avoid skin contact, spillage on the skin should immediately be removed with suitable cleanser, soap and water.
- Eye should be well flush with water and seek for medical attention immediately upon contact with this product.
- During the application, naked flame, welding operation and smoking is not allowed. Adequate ventilation should be provided.
- If you have any doubt regarding the suitability of use, refer to Nippon Paint for further advice.

DISCLAIMER
