**PRODUCT DESCRIPTION**

Hi-Pon 80-07 Novolac Vinyl Ester Primer is a two-pack, chemical resistant novolac-based vinyl ester coating. It is designed to promote adhesion to properly prepared carbon steel and concrete substrates. Suitable for use as primer in atmospheric and immersed environments.

**INTENDED USE**

It is used as primer for polyester and vinyl ester coating systems. Designed for use in the internal lining of chemical storage tanks and pipes, and for structural steelwork in environments where superior resistance to chemical attack is required. Suitable for use in most aggressive environments.

**SURFACE PREPARATION**

All surfaces should be clean dry, and free from contamination. The surface should be assessed and treated in accordance with ISO 8504. Oil or grease should be removed in accordance with SSPC-SP1 solvent cleaning.

**Abrasive Blast Cleaning**

Abrasive blast cleaning to Sa 2½ (ISO 8501-1:2007) or SSPC-SP6. For optimum performance, blast cleaned to SSPC-SP10 with a surface profile of 75 – 100 microns (3 – 4 mils). If oxidation has occurred between the blasting and application of this product, the surface should be re-blasted to the specified visual standard. Surface defect revealed by the blast cleaning process should be ground, filled or treated in the appropriate manner.

**Other Surfaces**

The coating may be used on other substrates. Please contact your local Nippon Paint office for more information.

**CONDITION DURING APPLICATION**

Avoid paint application when the temperature is below 10°C and relative humidity is above 80%.

The temperature of steel surface must be minimum 3°C above dew point of surrounding air. When surface temperatures exceed 35°C, Hi-Pon 80-07
should be overcoated as soon as hard dry to avoid intercoat adhesion problems.

**APPLICATION GUIDE**

| **Mixing Ratio** | : Base : hardener = 50.3 : 1 (by volume)  
Base and hardener should be mixed thorough before use. |
| **Pot Life** | : 25°C  
30 minutes  
(35°C  
20 minutes  
(Pot life will vary substantially with temperature) |
| **Theoretical Coverage** | : 7.50 m²/litre at 100 μm DFT |
| **Thinner** | : Do not thin |
| **Cleaner** | : Hi-Pon Vinyl Ester Thinner |

**APPLICATION METHOD**

Airless spray is recommended for application. Brush and roller are recommended for stripe coating and small areas. Care must be taken to achieve the specified dry film thickness.

**APPLICATION DETAILS**

| **Airless Spray** | : Tip Size  
0.019” – 0.025”  
Pressure at nozzle

3 days |

The given data must be considered as guidelines only. The actual drying time/times before recoating may be shorter or longer, depending on film thickness, ventilation, humidity, underlying paint system, requirement for early handling and mechanical strength etc. A complete system can be described on a system sheet, where all parameters and special conditions could be included.
The following paint system is recommended for Hi-Pon 80-07 Novolac Vinyl Ester Primer:

**Top Coat:**
- Hi-Pon 80-08 Novolac Vinyl Ester GF

For the choice of coating system for different application, refer to the product brochure or contact Nippon Paint for professional recommendation.

### Packaging

<table>

</thead>
<tbody>
<tr>
<td></td>
<td>Vol</td>
<td>Container Size</td>
</tr>
<tr>
<td></td>
<td>20L</td>
<td>19.61 L</td>
</tr>
</tbody>
</table>

### Storage

**Shelf life:** Part A: 5 months minimum (20°C)
Part B: 5 months minimum (20°C)

Subject to re-inspection thereafter. Higher temperature during storage may reduce the shelf life and may lead to gelling in the tin. Frequent temperature cycles may also shorten the shelf life.

Store in tightly closed container in a dry, cool and well ventilated space, keep away from sources of heat and ignition. Recommended storage temperature range is 10°C - 15°C to prolong shelf life for Base only. Best practice would be to store Part A and Part B in separate locations.

### Safety Precaution

- This product is intended for use of professional applicators. Refer to the safety information display on the container and in the safety data sheet (SDS) before using the product.
- Use this product in well-ventilated area, avoid skin contact, spillage on the skin should immediately be removed with suitable cleanser, soap and water.
- Eye should be well flush with water and seek for medical attention immediately upon contact with this product.
- During the application, naked flame, welding operation and smoking is not allowed. Adequate ventilation should be provided.
- If you have any doubt regarding the suitability of use, refer to Nippon Paint for further advice.
responsibility to determine the suitability of the product for the user's particular use. The condition of the substrate and application are not within Nippon Paint's control.
