Off WHITE

Good, Innocent and Pure

Image courtesy of Black N White House Interior Design Consultancy

Tips & Ideas

Cool whites suit rooms with a lot of sunlight as they tend to neutralise bright light. Consider Sail White 1199 if you have a modern, minimalistic theme.

Remembrance

Peaceful White
NP OW1009P

Hunny's Hut
NP BGG1718P

Off-White evokes cleanliness and order, making it ideal for traditionally small and cluttered spaces such as bathrooms and storerooms.

Tips & Ideas

Off whites such as Swan Wing NP OW 1017P with a tint of yellow can warm up your room and give it a spacious look.

Zingy YELLOW

Energetic, Passionate and Active

Tips & Ideas

Pale shades of yellow such as Sun Glint NP OW 1013P are best when painting interior walls because it promotes flow of positive energy.

Earth Yellow
3142

While light buttery yellow can be calming and restful in bedrooms, bright daffodil yellow extends a warm welcome in entrance halls and living rooms.

Tips & Ideas

Create a cozy mood. Use Memento Sparkle Gold Champagne MG 158 to add glamour and vary the yellow shades to create a soft, dimensional look.

ORIGINAL PAINTING TOOLS

PERFECT YOUR
PAINTING WORK

Introducing Nippon Paint's superior range of professional painting tools to complete your painting work. Time-tested and quality assured. Our comprehensive selection of painting accessories is the best choice for your perfect paint job

Preparation & Sequence

PREPARING THE GROUNDWORK

STEP 1
Clear out the room totally.

STEP 2
Clean up the area.

STEP 3
Cover all exposed surfaces with Nippon Paint Plastic Drop Cloth.

STEP 4
Paste the sockets and switches with Nippon Paint Masking Tape.

STEP 5
Use Nippon Paint Plastic Drop Cloth and Masking Tape to protect window frames and woodwork.

STEP 6
Cover and tape floor skirting with Nippon Paint Plastic Drop Cloth.

MENDING THE WALL with 5101 Odour~less Water-based Sealer or Vinilex 5170 Oil-based Sealer

STEP 1
Scrape off loose paint with a scraper and sand down for a smooth finish. Dust off.

STEP 2
Remove popped nails and fill up the dimples with filler.

STEP 3
Patch up cracks or uneven surfaces with the appropriate filler.

STEP 4
Use fine grit sandpaper to sand down rough spots.

STEP 5
Clean surfaces to be painted. All must be dried thoroughly before painting.

STEP 6
Before painting, use a wall sealer (5101 Odour~less sealer or Vinilex 5170 sealer) to neutralise the alkali on the walls.

SEQUENCE OF PAINTING

1

A: Always start with the ceiling.
B: Followed by the cornices.
C: Then the walls.
D: And the woodwork around doors and windows.
E: Subsequently the doors.
F: Lastly the skirtings.
This prevents the other painted areas from being ruined while painting.

3

A wide brush or roller may be used to paint the walls, though the latter gives the best finish and is quicker. Do apply the paint from the top right hand corner of the first wall using overlapping strokes, in an up-down manner when moving from area to area.

2

Use a brush and dip only one third of the brush bristles into the paint. Use long continuous strokes to form a neat line while painting difficult areas like the edges and corners first.

4

Always apply more than one coat of paint. Let the first coat dry before painting another coat over. An indication is found on the can for the first coat's drying time.

5

Upon completion, do wash all equipment. Water, for emulsion paint and turpentine, for oil-based paint.
